

Welcome. Passenger Safety and Protection is our Priority

Many new measures have been put in place for your safety and protection. Only passengers with a valid boarding pass should enter the terminal.

Social Distancing

To maintain social distance, we have applied floor markings to indicate the appropriate distance to queue or stand.

Continuous Cleaning

To maintain the highest hygiene standards, all surfaces and contact points are cleaned every 60 minutes throughout the day.

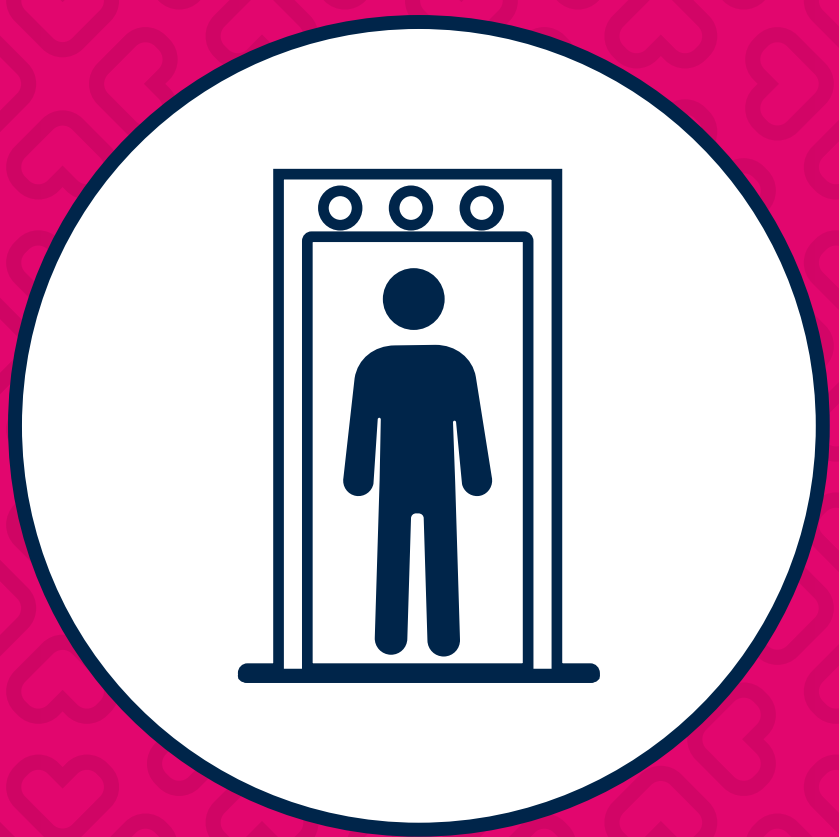

Hand Sanitisers

Hand sanitiser dispensers and stations are widely available throughout the terminal. Other individual hand sanitiser products can be purchased throughout your airport journey.

Face Masks

Please wear a face mask / covering throughout your airport journey and onto your flight. Face masks can also be purchased from vending machines located throughout the terminal. Please dispose of your face masks after use in the general waste bins.

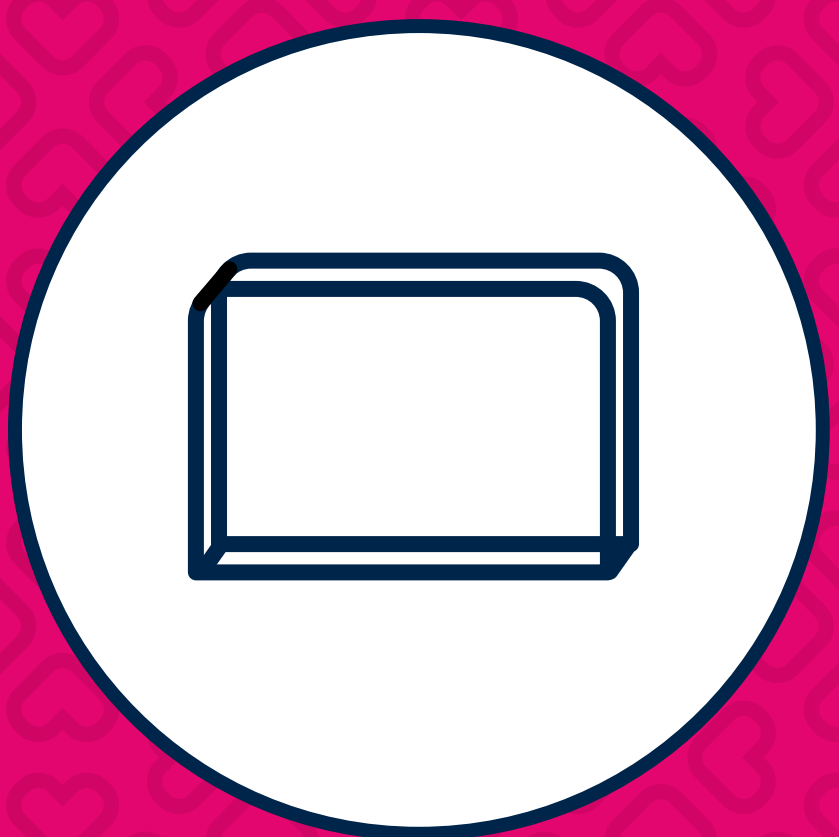

Security Screening

We have installed plexiglass screens at close contact points, and we ask that passengers wear a face mask, use hand sanitiser before and after Security and follow the floor markings to maintain social distancing. Equipment and trays are frequently disinfected for your use. The rest of the Security screening process remains the same, so please prepare as usual.

Seating

To maintain social distance, we have limited the number of seats available at the boarding gates and in the food & drink outlets, and we are prioritising seats for passengers with reduced mobility, families travelling with young children or women travelling while pregnant. Families are permitted to sit together.

Plexiglass Screens

We have installed plexiglass screens for areas that there are close contact points between passengers and staff such as: Security, Shopping, Cafes and Restaurants.

Food & Drink

The cafes and restaurants that are open have a range of options such as 'grab and go' that cater to your needs as well as contactless payment. Social distancing is actively managed by staff as well in addition to floor markers. Plexiglass screens have also been installed with a continuous cleaning regime throughout the day.

Shopping

To help you avail of the great shopping discounts on leading premium brands in-store, we have re-organised your Cork Airport shopping experience, so it is contactless and maintains social distancing.

Car Parks

We recommend that you book in advance online. We have made the car parks contactless, from payments to entry and exit and we have applied social distancing markers on the Red Express car park shuttle buses and in the bus shelters. We have also installed many hand sanitiser dispensers throughout.
